Heer Mehta

SOFTWARE DEVELOPER | M.Sc. INFORMATION TECHNOLOGY

mehta.heer910@gmail.com | linkedin.com/in/heer-mehta-14833928b | github.com/heer00

PROFILE

M.Sc. Information Technology student with hands-on experience exploring enterprise AI workflows and building backend APIs, full-stack applications, and machine learning projects. Open to software development roles and freelance projects, with a focus on backend and full-stack engineering.

EDUCATION

Dhirubhai Ambani University | M.Sc. Information Technology | Gandhinagar, Gujarat | 2025–Present | CPI: 6.38

Shreyarth University | B.Sc. Information Technology | Ahmedabad, Gujarat | 2022–2025 | CPI: 8.88

EXPERIENCE

Tata Motors - Digital.ai Labs | Intern | Thane, Mumbai | May 2026–July 2026

- Researched LLM, RAG, vector database, embedding, prompt engineering, and agent workflow approaches for enterprise AI use cases.
- Supported model experimentation and technical documentation using AI-assisted development tools.
- Worked in a Linux-based Oracle Cloud Infrastructure environment supporting AI model deployment workflows.

SELECTED PROJECTS

Book-E-Pedia | React, Django, REST APIs, SQLite — Contributed to a full-stack bookstore with catalog and product pages, cart functionality, and admin management. Integrated a React frontend with Django APIs and relational data models.

InsightEdge | Python, FastAPI, PyMuPDF, Firebase — Collaborated on a hackathon career guidance platform. Contributed resume parsing, structured skill extraction, role matching, and backend endpoints for resume analysis and chatbot integration.

Customer Segmentation | Python, Scikit-learn, Streamlit — Applied K-Means clustering to customer behavior data; used feature scaling and the elbow method to assess clusters, then built an interactive Streamlit application.

Forest Fire Detection | Python, TensorFlow/Keras, Scikit-learn — Built and evaluated a CNN-based wildfire detection project, documenting data preprocessing, visualization, and model analysis in Jupyter notebooks.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C++, SQL

Frontend: React, HTML5, CSS3, Bootstrap, responsive design

Backend & APIs: Django, Django REST Framework, FastAPI, REST APIs

Databases: PostgreSQL, MySQL, SQLite, Firebase

Data & AI: Pandas, NumPy, Scikit-learn, LLMs, RAG, embeddings

Tools: Git, GitHub, Linux, Postman, VS Code, Oracle Cloud Infrastructure

Foundations: Data structures, OOP, operating systems, DBMS, computer networks

ACHIEVEMENTS

- GenAI Powered Data Analytics Job Simulation, Forage | April 2026
- Deloitte Australia Data Analytics Virtual Experience, Forage | March 2026
- Participant, Ingenius Hackathon 2026 and InnovAItion Hackathon 2026
